Concept

A grain of Padi rice with it’s rich golden colour.

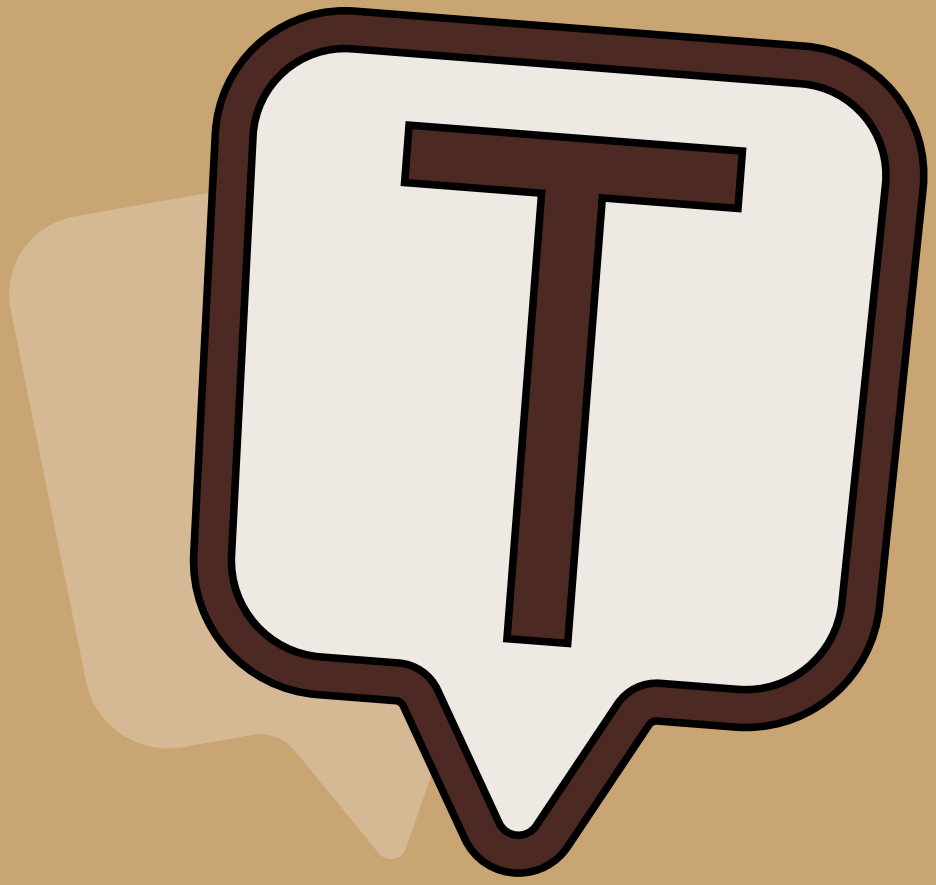

EXPLANATION

1. A grain of padi rice reshaped for better geometrical balance and show proffessionality

2. Six of it arranged, three for each, making an ‘S’ trying to interwine showing union of two people for the investors trust and also cleints in general.

3. The two ‘S’ the positive for the premium look of the brand and the negetive ‘S’ showing the culture and origin of the brand

The typeface fits Sakwa because it’s calm and friendly like an agro brand, yet geometric and clean enough to look professional to investors and stays legible on bags and signage.

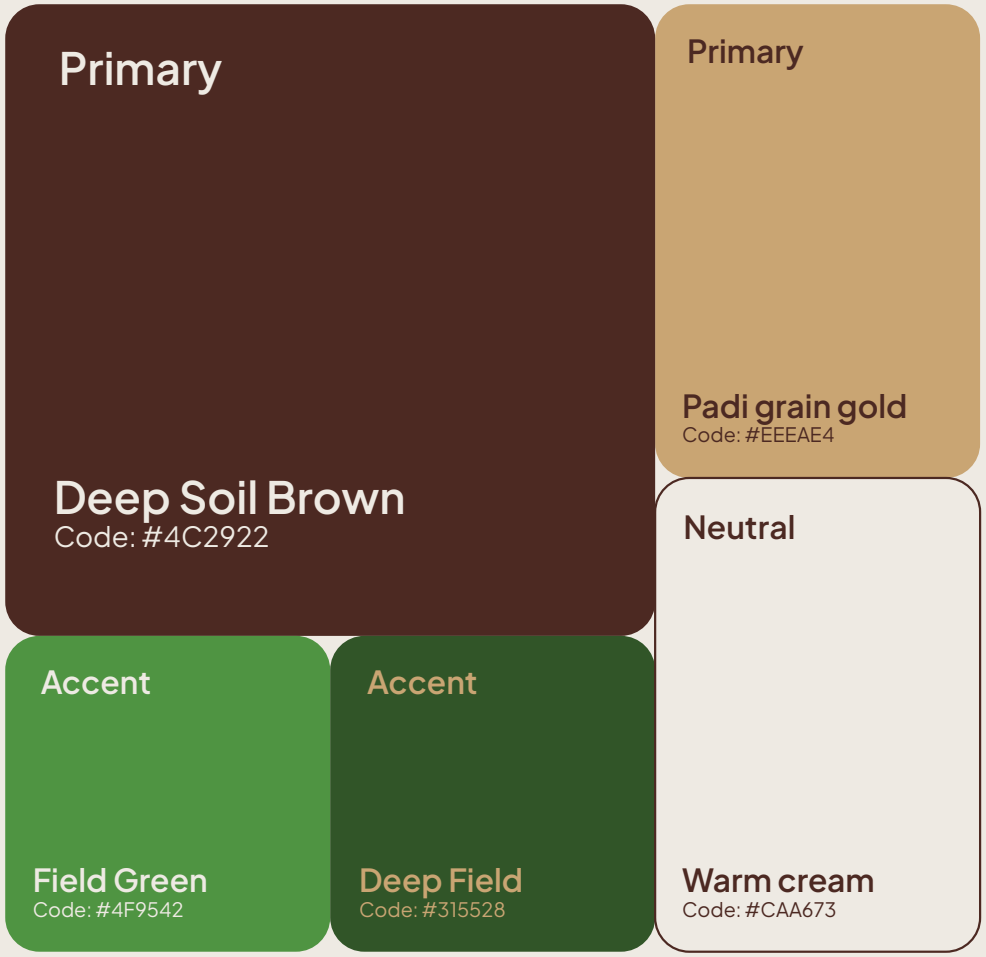

04

Colours

EXPLANATION

Primary

• Deep Soil Brown #4C2922: the colour of rich earth. It's the brand's anchor and carries the weight. Use it for the logo, headlines and body text, and as a solid background for bags and signage. It's your main text colour, with about 10:1 contrast on cream.

• Padi Grain Gold #CAA673: ripe rice grain, tied directly to the product. Use it for large shapes, the pattern, highlights and secondary backgrounds. Brown on gold is readable (about 5.6:1), but avoid gold text on cream (about 2:1).

Neutral

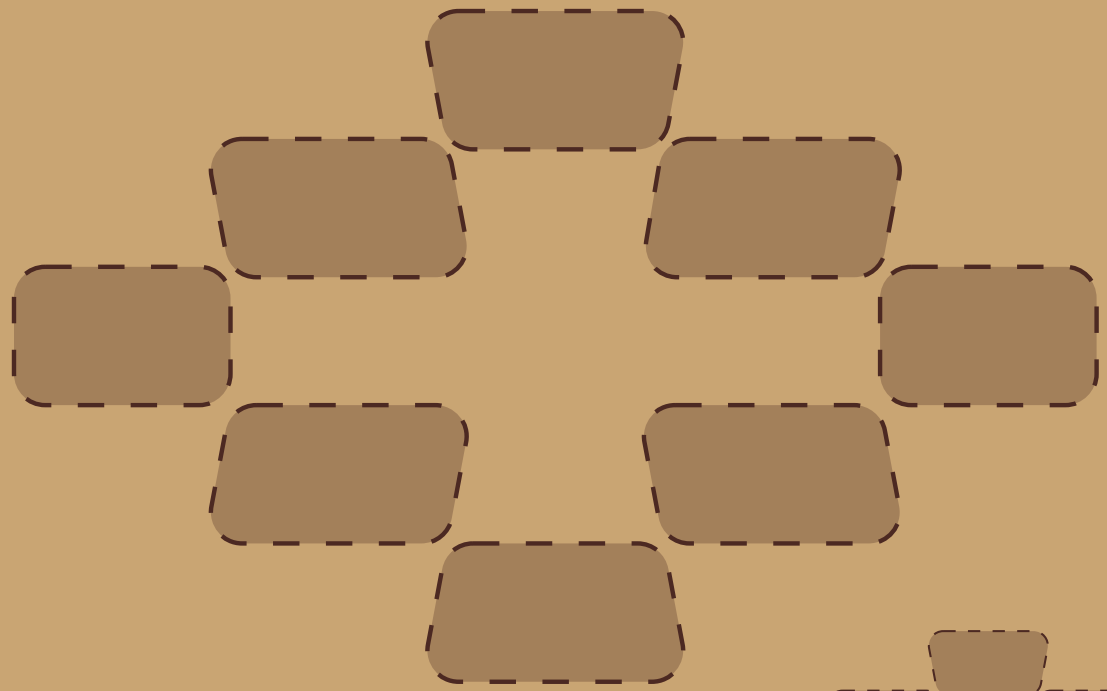

• Warm Cream #EEEAE4: a soft, natural base like rice flour. Use it for page backgrounds, white space and bag panels. It keeps the brand calm and open.

Accent

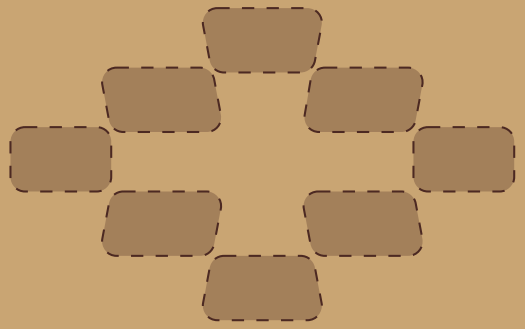

• Field Green #4F9542: a fresh, living green for crops and growth. Use it sparingly for small highlights, icons, tags and calls to action. It's too light for body text: about 3:1 on cream, so only large or bold text.

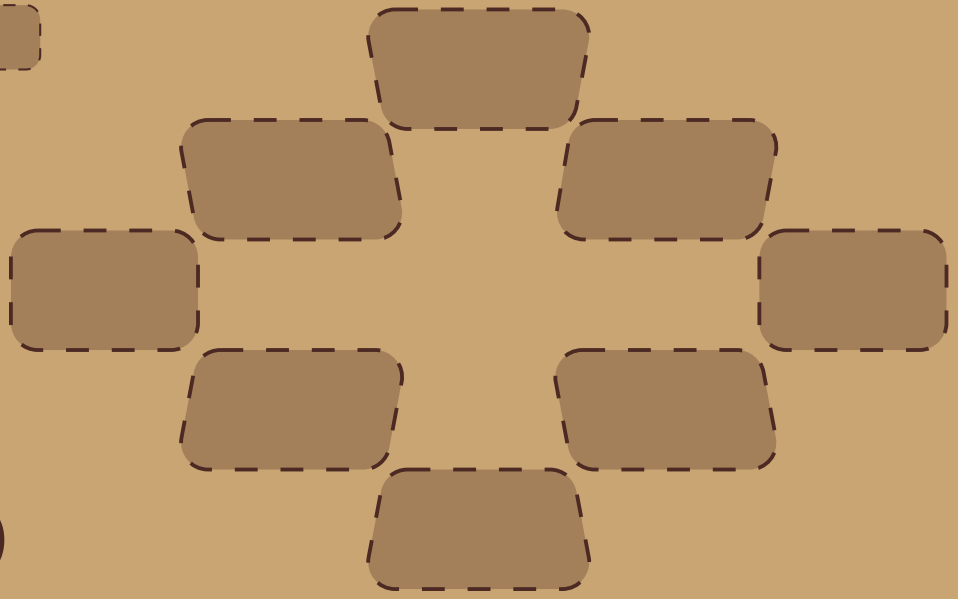

• Deep Field #315528: a dark forest green for depth and trust. Use it for secondary backgrounds, headers and panels, and for text on cream (about 7:1). Gold works on it for large text, as in your slide's label.

Balance: roughly 60% cream and brown, 25% gold, and 15% or less for the two greens. The greens give you a livestock and farm-fresh side without losing the earthy identity.

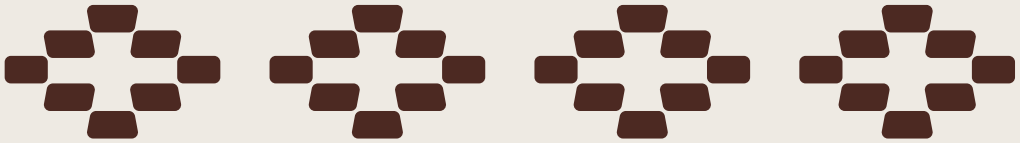

05

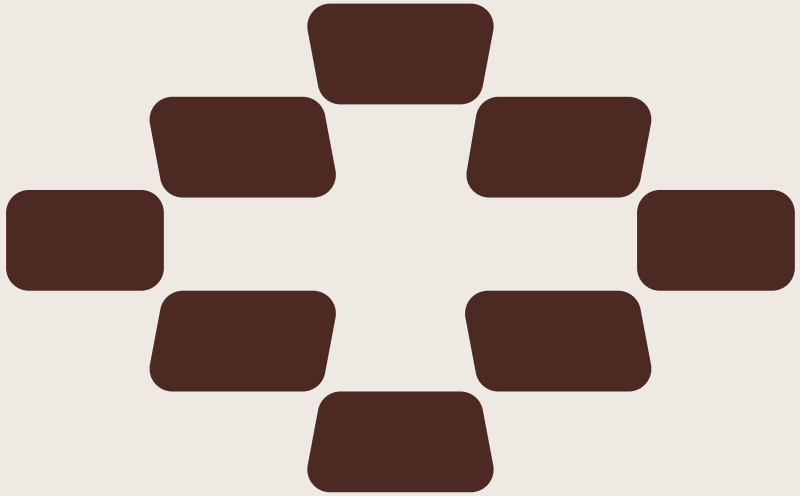

Patterns

EXPLANATION

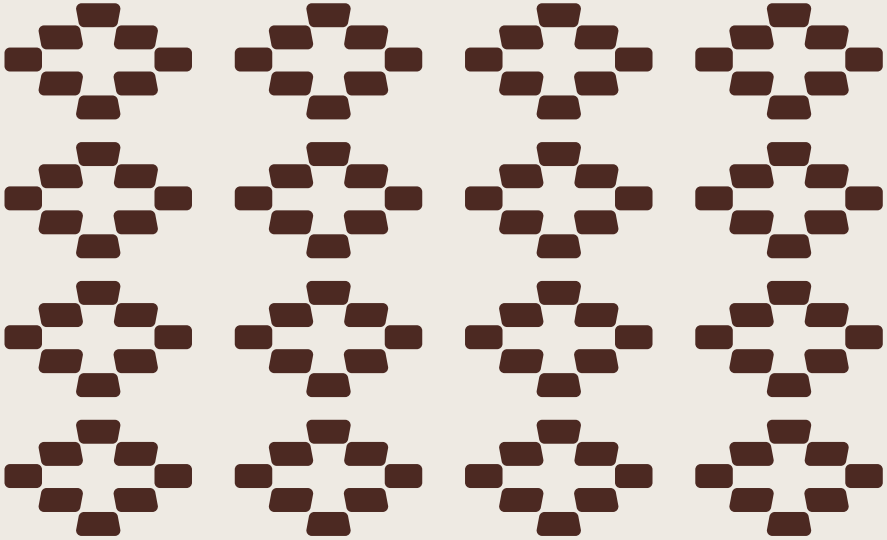

Primary

Single motif

- Use it as a border, band or full background on bags, signage and print.
- Pair it with Field Green, Deep Field or Rice White only.
- Keep it quiet: one scale per layout, never behind the logo or body text.
- Never stretch, rotate or recolour outside the palette.

Repeated

A VERY HUGE

Thank You!
